SUMMARY

Full-Stack Web Developer driven by a passion for problem solving, collaboration, and incorporating creativity into web design. Recent graduate of a coding boot camp at the University of Texas at Austin, ready to apply what I have learned and continue to gain as much knowledge as I can about web development.

SKILLS

Software/Platforms: GitHub, MySQL, NoSQL, JSON, Node.js, React, MongoDB, Express.js, Handlebars.js, Bootstrap

Software/Languages: CSS, Git, JavaScript, HTML5, APIs, SQL, GraphQL

Other: 3-D Modeling and Animation Certified, Web Development, Web Design, Search Engine Optimization (SEO), Back-end development, Front-end development

PROJECTS

Beat Spotify | <https://github.com/collin-mccarter/Beat-Spotify> | <https://bocabooii.github.io/Beat-Spotify/>

- Summary: This project demonstrates utilizing multiple server-side APIs to create an interactive game. By seamlessly integrating APIs for album images and song lyrics, the application challenges players to guess consecutive songs for a chance to secure a spot on the local highscore table.
- Role: Collaborator
- Tools: HTML, CSS, JavaScript, GoogleFonts, GitHub, RapidAPI, Bulma, Spotify API

Book'n Borrow | <https://github.com/collin-mccarter/book-n-borrow> | <https://booknborrow.herokuapp.com/>

- Summary: Book'n Borrow is an advanced platform empowering users to efficiently monetize their unused college textbooks while providing seamless access to the books they need. It facilitates book loans, enabling users to lend and rent textbooks effortlessly. With its intuitive search functionality, users can easily find and rent textbooks tailored to their specific course requirements.
- Role: Collaborator
- Tools: HTML, Google Fonts, Bootstrap, w3sley Bookcover API, JavaScript, CSS, Node.js, Handlebars.js, Sequelize, MySQL, Jira, Figma, GitHub, Heroku
